

NEWS RELEASE

BUREAU OF LABOR STATISTICS

U. S. DEPARTMENT OF LABOR

For Release: Thursday, July 19, 2018

18-936-CHI

MIDWEST INFORMATION OFFICE: Chicago, Ill.

Technical information: (312) 353-1880 BLSInfoChicago@bls.gov www.bls.gov/regions/midwest

Media contact: (312) 353-1138

County Employment and Wages in Michigan — Fourth Quarter 2017

Nine of the 10 large counties in Michigan had employment increases from December 2016 to December 2017, the U.S. Bureau of Labor Statistics (BLS) reported today. (Large counties are defined as those with employment of 75,000 or more as measured by 2016 annual average employment.) Assistant Commissioner for Regional Operations Charlene Peiffer noted that Washtenaw County had the largest increase, up 1.7 percent, followed by Ottawa County, up 1.3 percent. (See [table 1](#).)

Nationally, employment advanced 1.5 percent from December 2016 to December 2017 with 316 of the 346 largest U.S. counties registering increases. Midland, Texas, had the largest percentage increase in the country, up 11.5 percent over the year. Shawnee, Kan., and Caddo, La., had the largest over-the-year percentage decreases in employment among the largest counties in the U.S., with losses of 1.8 percent each.

Among the 10 largest counties in Michigan, employment was highest in Oakland County (735,100) and Wayne County (725,300) in December 2017. Two other counties, Kent (402,500) and Macomb (328,800), also had employment levels of more than 300,000. Collectively, Michigan's 10 large counties accounted for 70.0 percent of total employment within the state. Nationwide, the 346 largest counties made up 73.0 percent of total U.S. employment.

The average weekly wage in Saginaw and Oakland counties rose 3.7 and 3.6 percent, respectively, from the fourth quarter of 2016 to the fourth quarter of 2017, and were the largest increases among Michigan's large counties. (See [table 1](#).) Among the largest counties, Oakland had the highest average weekly wage in the state at \$1,253, followed by Wayne at \$1,212. Nationally, the average weekly wage rose 3.9 percent over the year, increasing to \$1,109 in the fourth quarter of 2017.

Employment and wage levels (but not over-the-year changes) are also available for the 73 counties in Michigan with employment levels below 75,000. With the exception of Midland County (\$1,800), all smaller counties had average weekly wages below the national average. (See [table 2](#).)

Large county wage changes

All of Michigan's large counties had over-the-year wage gains, but all were lower than the national increase of 3.9 percent. (See [table 1](#).) As noted, Saginaw and Oakland counties had the state's largest average weekly wage increases, up 3.7 and 3.6 percent respectively, and ranked 107th and 117th among the nation's 346 largest counties. One other large county, Washtenaw (3.2 percent, 151st), ranked among the top-half nationwide for wage growth.

Among the 346 largest counties in the U.S., 339 had over-the-year increases in average weekly wages in the fourth quarter of 2017. San Mateo, Calif., and Ada, Idaho, had the largest percentage increases in average weekly wages among the largest U.S. counties (11.5 percent each). Seven of the 346 largest counties experienced over-the-year decreases in average weekly wages. Clayton, Ga., had the largest percentage decrease in average weekly wages with a decline of 6.7 percent.

Large county average weekly wages

As noted, Oakland County (\$1,253) had the highest average weekly wage in the state and ranked 50th among the 346 largest U.S. counties. Wayne (\$1,212, 59th) and Washtenaw (\$1,134, 79th) also reported average weekly wages above the national average of \$1,109. Three other counties—Macomb (\$1,091), Ingham (\$1,041) and Kalamazoo (\$1,002)—had average weekly wages that placed in the top-half of the national ranking. Saginaw (\$897) had the lowest average weekly wage among the state's large counties and ranked 275th nationwide.

Nationally, weekly wages were higher than the U.S. average of \$1,109 in 95 of the 346 largest counties. Santa Clara, Calif., held the top position with an average weekly wage of \$2,576, followed by New York, N.Y. (\$2,439), and San Mateo, Calif. (\$2,341). Among the largest U.S. counties, more than two-thirds (251) reported average weekly wages below the national average in the fourth quarter of 2017. The lowest weekly wages were in the Texas counties of Cameron (\$652) and Hidalgo (\$664), followed by Horry, S.C. (\$674).

Average weekly wages in Michigan's smaller counties

Seventy-two counties in Michigan with employment below 75,000 had average weekly wages below the national average of \$1,109. Among these smaller counties, Midland had the highest average weekly wage at \$1,800, while Keweenaw had the lowest at \$515. (See [table 2](#).)

When all 83 counties in Michigan were considered, all but 4 had wages below the national average. Two had average weekly wages of \$649 or lower, 19 had wages from \$650 to \$749, 32 had wages from \$750 to \$849, 17 had wages from \$850 to \$949, and 13 had wages of \$950 or higher. (See [chart 1](#).)

Additional statistics and other information

QCEW data for states have been included in this release in [table 3](#). For additional information about quarterly employment and wages data, please read the [Technical Note](#) or visit www.bls.gov/cew.

Employment and Wages Annual Averages Online features comprehensive information by detailed industry on establishments, employment, and wages for the nation and all states. The 2016 edition of this publication contains selected data produced by Business Employment Dynamics (BED) on job gains and losses, as well as selected data from the first quarter 2017 version of the national news release. Tables and additional content from *Employment and Wages Annual Averages 2016* are now available online at www.bls.gov/cew/cewbuln16.htm. The 2017 edition of *Employment and Wages Annual Averages Online* will be available in September 2018.

The County Employment and Wages news release for first quarter 2018 is scheduled to be released on Wednesday, August 22, 2018.

QCEW Publication Acceleration and Conversion to Two Data Releases

The national QCEW publication process has accelerated for a more timely release. Beginning with the national fourth quarter 2017 release, QCEW data are now published in two parts. The current County Employment and Wages news release and associated data have been accelerated and published first. The full QCEW data release, with smaller county data contained in this release, occurs two weeks later.

Technical Note

Average weekly wage data by county are compiled under the Quarterly Census of Employment and Wages (QCEW) program, also known as the ES-202 program. The data are derived from summaries of employment and total pay of workers covered by state and federal unemployment insurance (UI) legislation and provided by State Workforce Agencies (SWAs). The 10.0 million employer reports cover 145.9 million full- and part-time workers. The average weekly wage values are calculated by dividing quarterly total wages by the average of the three monthly employment levels of those covered by UI programs. The result is then divided by 13, the number of weeks in a quarter. It is to be noted, therefore, that over-the-year wage changes for geographic areas may reflect shifts in the composition of employment by industry, occupation, and such other factors as hours of work. Thus, wages may vary among counties, metropolitan areas, or states for reasons other than changes in the average wage level.

QCEW data are not designed as a time series. QCEW data are simply the sums of individual establishment records reflecting the number of establishments that exist in a county or industry at a point in time. Establishments can move in or out of a county or industry for a number of reasons—some reflecting economic events, others reflecting administrative changes.

The preliminary QCEW data presented in this release may differ from data released by the individual states as well as from the data presented on the BLS Web site. These potential differences result from the states' continuing receipt, review and editing of UI data over time. On the other hand, differences between data in this release and the data found on the BLS Web site are the result of adjustments made to improve over-the-year comparisons. Specifically, these adjustments account for administrative (noneconomic) changes such as a correction to a previously reported location or industry classification. Adjusting for these administrative changes allows users to more accurately assess changes of an economic nature (such as a firm moving from one county to another or changing its primary economic activity) over a 12-month period. Currently, adjusted data are available only from BLS press releases.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8342.

Wayne, Mich.	725.3	0.2	302	1,212	59	2.4	241

Footnotes:

(1) Average weekly wages were calculated using unrounded data.

(2) Percent changes were computed from quarterly employment and pay data adjusted for noneconomic county reclassifications.

(3) Ranking does not include data for Puerto Rico or the Virgin Islands.

(4) Totals for the United States do not include data for Puerto Rico or the Virgin Islands.

Note: Data are preliminary. Covered employment and wages includes workers covered by Unemployment Insurance (UI) and Unemployment Compensation for Federal Employees (UCFE) programs.
